

Wood Sense HPL Collection

The warmth of wood. The freedom of HPL.

The warmth of wood. The freedom of HPL.

16 wood decors for large-scale display. With continuous high repeat, impressive feel and easy handling.

Real wood is and will always be exceptional. Our wood laminate decors translate this character into a plannable surface: astonishingly close to the look and feel of the real thing, yet with reliable selection, ordering and replacement options. The patterns run continuously –

without interruption – and most decors are available up to 4,100 mm. For architects and planners, this means fewer meetings to consult and agree on samples, and more design freedom in the details.

Advantages at a glance

Impressive look

Real wood appearance

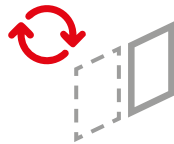

Continuous repeat

Extended height with no interruptions

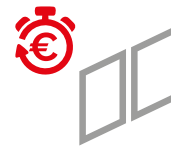

Impressive haptics

Feels like real wood

Easy to replace

Consistent appearance, reliably reproduced

Efficient coordination

Fast sampling saves time

Sustainability

All laminates come with an EPD label
